

SkillServe

User Mobile Functionalities — Flutter

This document defines the user-side mobile modules designed to work with the SkillServe Admin Web functionalities. The mobile application serves clients and service providers, while administrative approval, moderation, verification, platform management, and system control remain on the admin web side.

1. User Authentication and Account Module

Functionality	Description
1.1. User Registration	Allows clients and service providers to create a user account using the required registration information.
1.2. User Login	Authenticates user credentials and grants access to the mobile application according to the user's account type and permissions.
1.3. User Logout	Safely terminates the user's current session and prevents unauthorized access to the account.
1.4. Password Management	Allows users to change their password and recover account access through the supported verification process.
1.5. Session Management	Maintains the user's authenticated session and requires re-authentication when the session expires or becomes invalid.
1.6. Account Status Display	Displays whether the user's account is active, suspended, banned, or otherwise restricted, including applicable administrative notices.

2. User Profile Module

Functionality	Description
2.1. View Profile	Allows users to view their personal information, account details, verification status, and relevant activity.
2.2. Edit Profile	Allows users to update permitted personal and profile information maintained by the platform.
2.3. Profile Photo Management	Allows users to add, change, or remove their profile photo where supported.
2.4. View Account Status	Displays the current account status and applicable restrictions or administrative actions.
2.5. View Activity History	Allows users to review relevant account, booking, service, and interaction history.

3. Service Discovery Module

Functionality	Description
3.1. Browse Services	Displays approved and publicly available services managed through the admin web system.
3.2. Search Services	Allows users to search services by service title, provider, category, or related keywords.
3.3. Filter Services	Allows users to narrow available services by category, rating, provider, availability, and other supported criteria.
3.4. View Service Details	Displays the service description, provider information, pricing or service details, ratings, and booking-related information.
3.5. View Featured Services	Displays services selected by administrators as featured for increased visibility.
3.6. View Service Categories	Displays active service categories and subcategories configured by administrators.

4. Service Provider Discovery Module

Functionality	Description
4.1. Browse Service Providers	Displays available and verified service providers who can offer services through the platform.
4.2. Search Service Providers	Allows users to search providers using name, skills, services, or other supported information.
4.3. Filter Service Providers	Allows users to filter providers according to category, rating, recognition, availability, and other criteria.
4.4. View Provider Profile	Displays provider skills, experience, portfolio, services, ratings, badges, and relevant booking information.
4.5. View Provider Verification Status	Displays whether a provider has completed the platform's verification requirements.
4.6. View Provider Recognition	Displays administrator-managed badges, featured status, and top-rated recognition when applicable.

5. Booking Module

Functionality	Description
5.1. Create Booking	Allows a client to request a service from a selected provider by submitting the required booking information and schedule.
5.2. View Booking Details	Displays the selected service, provider, schedule, booking status, and other relevant booking information.
5.3. View My Bookings	Displays the user's current and previous bookings with their corresponding statuses.
5.4. Monitor Booking Status	Allows users to track pending, confirmed, active, completed, cancelled, and disputed booking states.
5.5. Booking History	Displays the complete history and status changes of the user's bookings.
5.6. Cancel Booking	Allows users to request or perform booking cancellation according to the platform's configured cancellation rules.
5.7. Report or Dispute Booking	Allows users to submit a dispute when a booking has a problem that requires administrative review.

6. Reviews and Ratings Module

Functionality	Description
6.1. Submit Review	Allows eligible clients to submit feedback about a completed service or provider.
6.2. Submit Rating	Allows eligible clients to provide a rating based on their service experience.
6.3. View Reviews	Displays published reviews and ratings associated with services and providers.
6.4. Report Review	Allows users to report reviews that may contain inappropriate, misleading, or policy-violating content.
6.5. View My Reviews	Allows users to view reviews and ratings they have submitted.

7. Messaging and Communication Module

Functionality	Description
7.1. View Conversations	Displays the user's conversations with relevant service providers or clients.
7.2. Send Message	Allows users to communicate about services, bookings, schedules, and other permitted concerns.
7.3. Receive Messages	Allows users to receive messages and updates from other authorized users.
7.4. Message History	Maintains accessible conversation history for relevant user interactions.
7.5. Report Message	Allows users to report inappropriate, abusive, suspicious, or otherwise prohibited messages for administrative moderation.

8. Notifications and Announcements Module

Functionality	Description
8.1. View Notifications	Displays system-generated notifications related to bookings, services, messages, account status, and other platform events.
8.2. Receive Booking Notifications	Notifies users when a booking is created, confirmed, updated, cancelled, completed, or disputed.
8.3. Receive Service Notifications	Provides relevant updates about services, providers, approvals, or availability.
8.4. View Announcements	Displays announcements published by administrators for users or specific user groups.
8.5. Targeted Notifications	Receives notifications targeted to all users, clients, service providers, or selected users based on administrator configuration.
8.6. Notification History	Allows users to review previously received notifications and announcements.

9. Service Provider Account Module

Functionality	Description
9.1. Become a Service Provider	Allows eligible users to submit the required information to register or apply as a service provider.
9.2. Manage Provider Profile	Allows service providers to maintain their skills, experience, portfolio, and professional information.
9.3. Submit Verification	Allows service providers to submit required verification information and documents for administrative review.
9.4. View Verification Status	Displays whether the provider verification is pending, approved, rejected, or requires additional information.
9.5. Respond to Information Request	Allows providers to submit additional information or documents requested by administrators.
9.6. Provider Account Restrictions	Displays provider suspension or verification changes applied by administrators.

10. Service Management for Providers Module

Functionality	Description
10.1. Create Service	Allows verified service providers to submit a service with the required details for administrative review.
10.2. View My Services	Displays services created by the provider and their current publication or approval status.
10.3. Edit Service	Allows providers to update permitted service information according to platform rules.
10.4. Submit Service for Review	Allows providers to submit or resubmit service information for administrative approval.
10.5. View Service Approval Status	Displays whether a submitted service is pending, approved, rejected, hidden, or otherwise restricted.
10.6. Manage Service Availability	Allows providers to maintain supported service availability information used during booking.

11. Dispute Module

Functionality	Description
11.1. Submit Dispute	Allows a client or service provider to submit a dispute regarding a booking or service transaction.
11.2. View My Disputes	Displays disputes submitted by the user and their current status.
11.3. View Dispute Details	Displays the booking information, submitted statements, evidence, and dispute status.

Functionality	Description
11.4. Submit Evidence	Allows involved users to provide screenshots, files, messages, or other supported evidence for administrative review.
11.5. View Dispute Updates	Displays relevant updates and decisions made during the dispute process.

12. Support Module

Functionality	Description
12.1. Create Support Ticket	Allows users to submit a support request regarding account, service, booking, technical, or other supported concerns.
12.2. View My Support Tickets	Displays submitted support tickets and their current statuses.
12.3. View Ticket Details	Displays the concern, submitted information, support responses, and ticket history.
12.4. Reply to Support Ticket	Allows users to provide additional information or respond to support staff.
12.5. View Ticket Status	Displays whether a support request is open, assigned, in progress, or resolved.

13. Search and Personalized Discovery Module

Functionality	Description
13.1. Global Search	Allows users to search available services, providers, and other permitted public content from one search interface.
13.2. Search Suggestions	Provides relevant search suggestions based on available platform information.
13.3. Recent Searches	Allows users to review or clear their recent search terms where supported.
13.4. Featured Providers	Displays providers highlighted by administrators.
13.5. Top-Rated Providers	Displays providers recognized for strong ratings and service performance.

14. User Settings and Preferences Module

Functionality	Description
14.1. Notification Preferences	Allows users to manage supported notification preferences for platform updates.
14.2. Privacy Settings	Allows users to manage available privacy-related account preferences.
14.3. Application Preferences	Allows users to configure supported mobile application preferences.
14.4. View Platform Policies	Allows users to access the platform's terms, privacy policy, community guidelines, and other published policies.

15. Data and Account Control Module

Functionality	Description
15.1. View Account Data	Allows users to review the personal account information maintained by the platform.
15.2. Request Account Deactivation	Allows users to request deactivation of their account according to platform procedures.
15.3. Request Account Deletion	Allows users to request deletion of their account and eligible associated data subject to applicable platform rules.
15.4. Account Status and Restriction Information	Provides users with clear information about applicable account restrictions or administrative actions.

16. Mobile Security Module

Functionality	Description
16.1. Secure Authentication	Protects access to the mobile application through authenticated sessions and secure credential handling.
16.2. Session Expiration Handling	Requires users to authenticate again when their session expires or becomes invalid.
16.3. Unauthorized Access Protection	Prevents access to protected user information and functions without valid authorization.
16.4. Security Notifications	Displays relevant security or account activity notifications when supported by the platform.

17. Logout Module

Functionality	Description
17.1. User Logout	Safely terminates the user's current session and returns the user to the authentication screen.
